**FOUNDATIONS OF CLINICAL RESEARCH****Applications to Evidence-Based Practice, Fourth Edition**

Leslie G. Portney

How do you become a successful evidence-based practitioner? How do you evaluate the evidence? Is the information accurate, relevant and meaningful for clinical decision making? Did the design fit the research questions and was the analysis and interpretation of data appropriate?

Here are all the materials you need to take your first steps as an evidence-based practitioner, from how to use the design, data and analysis of research as the foundation for effective clinical decision making. You'll find support every step of the way as you progress from the foundations of clinical research and concepts of measurement through the processes of designing studies and analyzing data to writing your own research proposal.

- Updated examples provide relevant context for understanding designs and analyses.
- Diagrams assist in understanding experimental and observational design variations.
