Broadview Press

HIGHLIGHT

A collection of essays on a broad range of themes and figures spanning the entire period extending from the Pre-Socratics to Plato, Aristotle, and the Hellenistic thinkers.

Rather than offering synoptic and summary treatments of pre-established positions and themes, these essays engage with the ancient texts directly, focusing attention on concepts that emerge as urgent in the readings themselves and then clarifying those concepts interpretively. Indeed, this is a companion volume that takes a very serious and considered approach to its designated task — accompanying readers as they move through the most crucial passages of the infinitely rich and compelling texts of the ancients. Each essay provides a tutorial in close reading and careful interpretation.

Paperback £34.95 / €49.00
A compact yet comprehensive book offering an explanation and critique of the major theories that have shaped philosophical ethics. Engaging with both historical and contemporary figures, this book explores the scope, limits, and requirements of morality. DeNicola traces our various attempts to ground morality: in nature, in religion, in culture, in social contracts, and in aspects of the human person such as reason, emotions, caring, and intuition. Each chapter opens with a provocative real case or fictional scenario that helps to illuminate the issues at hand. The book is rich in argumentation, and each chapter is followed by discussion questions and questions for personal reflection.

SIN
A Thomistic Psychology
Steven J. Jensen
May 2018 277pp
9780813231337
Paperback £34.95 / €42.00
Does the ultimate good after which we all strive have unity, or is it simply a collection of basic goods? What is venial sin? What momentous choice must a child make in his first moral act? In what way do passion, a habitually evil will, and ignorance cause human beings to sin? What is the first cause of moral evil? Do human beings have free will to determine themselves to particular actions? The discussion of these topics focuses upon the interplay of reason, will, and the emotions, examining the inner workings of our moral deliberations. Ultimately, the book reveals how the failure to maintain balance in our deliberations subverts our fidelity to the one true good.

ON LIFE
Leo Tolstoy
Edited by Inessa Medzhidovskaya
Nov 2018 264pp
9/80810138032 Paperback £29.95 / €34.00
9/80810138049 Hardback £10/00 / €119.00
In the summer of 1886, shortly before his fifty-eighth birthday, Leo Tolstoy was seriously injured while working in the fields of his estate. Bedridden for over two months, Tolstoy began writing a meditation on death and dying that soon developed into a philosophical treatise on life, death, love, and the overcoming of pessimism. Although begun as an account of how one man encounters and laments his death and makes this death his own, the final work, On Life, describes the optimal life in which we can all be happy despite our mortality.

This critical edition is the first accurate translation of this unsung classic of Russian thought into English, based on a study of manuscript pages of Tolstoy’s drafts, and the first scholarly edition of this work in any language.

An experiment in thinking difference/thinking differently, an ethics of otherness and the abstract, Golub inverts the unreality of the real and the reality of fiction, exposing the tropes of memory, identity, and authenticity as a scenic route through life that ultimately blocks the view. The book draws upon materials that have not previously been included in studies of either the baroque or film noir.

Offers a vision of the form, meaning, and value of intellectual practice. Omedi Ochieng argues that rigorous thought about the form and contours of intellectual practices is best envisioned in light of a critical contextual ontology - that is, a systematic account of the context, forms, and dimensions in and through which knowledge and aesthetic practices are created, embodied, translated, and learned.
