## **FUNDAMENTALS OF HUMAN BIOLOGY & HEALTH**

### **Fifth Edition**

*Heather Murdock*

Gives students a solid understanding of how human cells, tissues, organs, organ systems, and whole organisms operate. The material includes clear, concise information covering the main physiological systems in the human body, their interconnections, and what individuals can do to maintain healthy bodies and lifestyles.

The text explores how and why we study biology, and where human beings fit into the amazing diversity of life. There is also coverage of basic chemistry as it relates to the study of biology. After a tour of the typical human cell, the text provides information on different tissues and organ systems. This includes relevant disorders, diseases, drugs, nutrition, and various health issues. Subsequent material addresses genetics, evolution, ecology, and conservation.

## **BEYOND DNA**

### **How Epigenetics is Transforming our Understanding of Evolution**

*Benjamin Oldroyd*

For nearly a hundred years evolutionary biologists have understood that evolution proceeds by substituting better genes for less good ones. But consensus is growing that this is not the whole story: geneticists are now revealing that spores, sperm, pollen and ova are packed with personalised genetic information that plays an important role in offspring development and has lifelong effects. This epigenetic - or 'extra-genetic' - inheritance therefore makes significant contributions to evolutionary processes.

Benjamin Oldroyd explains how a greater appreciation of the role of epigenetics is helping to solve a multitude of previously intractable problems in evolutionary biology - puzzles as varied as why invasive plants and animals can rapidly adapt to changes in their environment, how worker bees and queen bees can develop from the same egg, and why cancer becomes more common as we age.

### EXPLORING GENOME'S JUNKYARD In the Labyrinth of Evolution

Subir Ranjan Kundu

Narrates the progress of biological evolution, beginning with the conceptual introspection of gene and continuing with the contemporary understanding of the structural and function aspects of the human genome.

2022 200pp  
9781680538687 Hardback £112.00 / €123.00

### MITOCHONDRIAL EVE AND Y-CHROMOSOMAL ADAM A Defined Redux of Human Evolution

Subir Ranjan Kundu

Discusses theoretical ideas, interpretations, and paleontological evidence to narrate the origin and evolutionary story of Sapiens through the transitional stages

of archaic human species involved in the evolutionary pilgrimage, from the great apes and to modern humans.

2022 200pp  
9781680537024 Hardback £157.00 / €172.00

Bethesda Scientific

Delve Publishing

### eBook available BACTERIAL CELL BIOLOGY

Edited by Olivia Bouisset

Edited by experts, this book includes contributions discussing dimensional organisation of the bacterial cell and various subcellular structures found in bacteria.

Providing an integrated collection of contributions from leading researchers and scientists, this book will be of invaluable reference for researchers and of general use to teachers, students, and scientists in bacterial cell biology.

Apr 2023 300pp  
9781773611907 Hardback £165.00 / €183.00

### eBook available BASIC BIOLOGY

Khushboo Chaudhary & Pankaj Kumar Saraswat

As a field of science, biology helps us understand the living world and the ways its many species function, evolve, and interact. Advances in medicine, agriculture, biotechnology, and many other areas of biology have brought

improvements in the quality of life. The goal of this book is to assist students to understand the concepts of the field.

Apr 2023 277pp  
9781774695142 Hardback £180.00 / €200.00

### eBook available BIOLOGY AS A NATURAL SCIENCE The Study of Life in All Its Forms

Saket Kushwaha

Provides an introduction to biology. This book sheds light on the concept of the science of life and its chemical basis. It also explains cells, genes,

heredity, the diversity of life, and nervous system, sensory system, and immune system.

Mar 2023 277pp  
9781774695012 Hardback £180.00 / €200.00

 eBook available

### CELL TECHNOLOGY

Khushboo Chaudhary

Helps students understand the concepts of this vast field. Topics covered are inclusive but not limited to cell biology, cell biochemistry, cell enzymology, cell immunology, cell molecular, cell genetics, cell microbiology, cell metabolic, biotechnology, plant biotechnology,

animal biotechnology, bioinstrumentation and techniques.

Apr 2023 277pp

9781774695166 Hardback £180.00 / €200.00

 eBook available

### KEY CONCEPTS IN GENETICS

Abeer Iqbal

Explains in detail key genetic terms. Genetics is the scientific study of genes and heredity - of how certain qualities or traits are passed from parents to offspring as a result of changes in DNA sequence.

Apr 2023 277pp

9781774693933 Hardback £180.00 / €200.00

IK International Pvt. Ltd

### TOXICITY AND BIOREMEDIATION OF SELECTED XENOBIOTIC COMPOUNDS

A Monograph

Nirmal Kumar

Evaluates and assesses the toxicity, mode of action of xenobiotic compounds like 2,4-D ethyl ester (herbicide), pencycuron (fungicide),

Anthracene (ANT) and Pyrene (PYR) (PAHs) on selected species of microorganism.

Mar 2023 348pp

9789386768605 Paperback £185.00 / €205.00

Kendall Hunt Publishing Company

### BASIC LIFE MECHANISMS EXPERIMENTS

Sixth Edition

Madelyn Tucker & Linda R. Van Thiel

The exercises and background material found in this title guide hands-on investigation into mechanisms of biological processes. Activities explore basic lab techniques and biotechnologies, and provide students an introduction to biochemistry, genetics, cellular biology, and microbiology.

Apr 2023 150pp

9781792482892 Spiral bound £44.95 / €49.00

### BIOINFORMATICS

Methods and Applications: Genomics, Proteomics and Drug Discovery, Fifth Edition

S.C. Rastogi, P. Rastogi & N. Mendiratta

Designed as a comprehensive text for students and professionals pursuing careers

in the fields of bioinformatics, molecular biology, pharmacy and drug research, this fifth edition offers a fascinating and authoritative treatment of the entire spectrum of bioinformatics, covering a wide range of high-throughput technologies.

Jan 2023 624pp

9789354438219 Paperback £43.95 / €50.00

# Introduction to Molecular Science

Edited by: **Ageetha Vanamudan**

 **Delve**  
PUBLISHING

 eBook available

## INTRODUCTION TO MOLECULAR SCIENCE

*Edited by Ageetha Vanamudan*

Covers all topics of General Chemistry, beginning with the basics of the atom, molecules, and its behaviour, then the chemical properties of matter, the chemical changes and reactions that take place, the energy changes that are involved in chemical reactions. Various aspects and clear applications of electrochemistry, nuclear chemistry and Environmental chemistry related topics are also covered in simple language so that students can understand easily. It gives a clear relationship between the raw materials and the products made from various materials like metals, ceramics, glass, polymers etc.

Apr 2023 277pp

### ACIDITY AND BASICITY IN CHEMISTRY

Edited by Saeed Farrokhpay

Based on the notion that most, if not all, reactions in organic and inorganic chemistry can be explained using variants of fundamental acid-base principles, this book utilizes a variety of strategies to foster relational knowledge, enabling students to thoroughly grasp the fundamental ideas of organic chemistry.

Apr 2023 277pp

9781774694336 Hardback £185.00 / €205.00

 eBook available

### BIOCHEMISTRY AND ITS APPLICATION

Edited by Papita H Gourkhede

Covers the diversity of biomolecules present in living organisms, their characterization techniques, clinical biochemistry and genetic information transfer process.

Apr 2023 277pp

9781774695050 Hardback £185.00 / €205.00

 eBook available

### THE FUNDAMENTALS OF MATERIALS CHEMISTRY

Edited by Saeed Farrokhpay

Provides in-depth technical knowledge on material chemistry and its applications. The book includes fundamental and history of material, as well as chemistry and application of common advanced materials.

Apr 2023 277pp

9781774694343 Hardback £185.00 / €205.00

 eBook available

### A GUIDE TO ENVIRONMENTAL CHEMISTRY

Rainer Roldan Fiscal

Explores the sources, responses, transport, impacts, and purpose of chemical species in the air, water, and lands, and the impact of human activities on different sections, like the hydrosphere, lithosphere, and biosphere.

Apr 2023 277pp

9781774694541 Hardback £185.00 / €205.00

 eBook available

### HANDBOOK OF CATALYSIS

Praveen Bhai Patel

Covers the principles of catalysis as well as contemporary ideas and applications. This book covers all critical areas of this vital subject, including homogeneous, heterogeneous, and biocatalysis, as well as kinetics, catalyst characterization and production, and reactor design.

Apr 2023 277pp

9781774694053 Hardback £185.00 / €205.00

 eBook available

## INTRODUCTION TO ENZYMOLOGY

Sudheer Awasthi

Provides an overview of enzymes, including a description of the field's essential concepts, how to use various technologies and equipment, and examples of applications in human health and disease. This book offers an easy-to-

understand overview of ideas, guidelines, and, in particular, complex instrumentation techniques.

Apr 2023 277pp

9781774695104 Hardback £185.00 / €205.00

 eBook available

## INTRODUCTION TO PROTEOMICS

Sudheer Awasthi

Presents an overview of proteomics, including a discussion of the field's fundamental ideas, how to use various technologies and instruments, and examples of applications in human health and illness. This book offers

a comprehensive review of the concepts, guidelines, and especially the difficult instrumentation procedures in proteomics.

Apr 2023 277pp

9781774695098 Hardback £185.00 / €205.00

 eBook available

## KEY CONCEPTS IN BIOCHEMISTRY

Abeer Iqbal

Offers a brief explanation of the key terms and concepts of Biochemistry. Biochemistry is the study of chemical processes within and relating to living organisms.

A sub-discipline of both chemistry and biology, biochemistry may be divided into three fields: structural biology, enzymology and metabolism.

Apr 2023 277pp

9781774693810 Hardback £185.00 / €205.00

 eBook available

## MODERN TOXICOLOGY AND DEVELOPMENTS

Sudheer Awasthi

Provides an overview of toxicology, including the description of the essential theories, technologies and tools. Different examples of toxicology applications in human health are thoroughly discussed.

Apr 2023 277pp

9781774695067 Hardback £185.00 / €205.00

 eBook available

## AN OVERVIEW OF INORGANIC COMPOUNDS

Rose Marie O. Mendoza

Covers the physical and chemical characteristics of individual compounds in depth, with stress on the use of physical laws, investigative procedures, and theoretical analysis of experimental findings. This book delves into

the synthesis, characteristics, reactions, and structural geometries of a number of compounds.

Apr 2023 277pp

9781774694312 Hardback £185.00 / €205.00

 eBook available

## THE STUDY OF IONS AND SALTS IN CHEMISTRY

Rose Marie O. Mendoza

Bridges the gap between food scientists and chemists by providing a practical foundation to ionic chemicals and salts. It stresses the link between structure at the atomic level and the symmetry and characteristics of ionic compounds,

and it discusses the fundamental concepts of architecture and bonding in ionic compounds.

Apr 2023 277pp

9781774694329 Hardback £185.00 / €205.00

### ESSENTIALS OF CHEMISTRY

**General, Organic, and Biochemistry, Volume I**

*Owen McDougal et al*

Provides students with a brief yet complete guide to foundational knowledge and concepts in chemistry. This is the first textbook in a two-volume series designed to help students learn and apply critical information and skillsets within the discipline.

2022 256pp

9781793561503 Paperback £104.00 / €114.00

### THINKING THROUGH ORGANIC CHEMISTRY

*John C. Hershberger*

Introduces students to the knowledge and skillsets they require to better understand organic chemistry and find success in its real-world application. This book and its associated practice materials provide readers with an effective framework for thinking through and approaching various problems.

Jan 2023 138pp

9781793533258 Paperback £77.00 / €85.00

IK International Pvt. Ltd

### A TEXTBOOK OF ENGINEERING CHEMISTRY

*Savita Garg*

Covers all the disciplines of engineering chemistry, such as inorganic, organic, organometallic, synthetic, physical, applied, industrial, spectroscopic and titrimetric chemistry. Each chapter consists of a methodical introduction, historical background, in depth discussion, practical applications and significance.

2022 466pp

9789390620197 Paperback £57.00 / €63.00

### THERMAL ANALYSIS

**Techniques and Applications**

*N. K. Kaushik & S. K. Shukla*

Covers the complete range of thermal characterization techniques, including thermogravimetric analysis, differential thermal analysis, differential scanning calorimetry, and thermomechanical analysis. The principles, instrumentation and applications of different thermal characterization methods are discussed.

Feb 2023 288pp

9789386768735 Paperback £145.00 / €160.00

### THE SIX PILLARS OF CALCULUS

Lorenzo Sadun

Offers a conceptual and practical introduction to differential and integral calculus for use in a one- or two-semester course.

#### Biology Edition

*Pure and Applied Undergraduate Texts, Vol. 60*

The core ideas are introduced by modeling the spread of disease, tracking changes in the amount of CO<sub>2</sub> in the atmosphere, and optimizing blood flow in the body. Along the way, students learn about optimal drug delivery, population dynamics, chemical equilibria, and probability.

Jul 2023 383pp  
9781470469962 Paperback £90.00 / €100.00

**American Mathematical Society**

#### Business Edition

*Pure and Applied Undergraduate Texts, Vol. 56*

The core ideas are introduced by modeling market penetration of a new product, tracking changes in the national debt, and maximizing the profit of a business. Students will learn about present value, consumer and producer surplus, amortization, and probability.

Jul 2023 381pp  
9781470469955 Paperback £90.00 / €100.00

### THE LESS IS MORE LINEAR ALGEBRA OF VECTOR SPACES AND MATRICES

Daniela Calvetti & Erkki Somersalo

Designed for a proof-based course on linear algebra, this rigorous and concise textbook intentionally introduces vector spaces, inner products, and vector and matrix norms before Gaussian elimination and eigenvalues so students can quickly discover the singular value decomposition (SVD) - arguably the most enlightening and useful of all matrix factorizations. Gaussian elimination is then introduced after the SVD and the four fundamental subspaces and is presented in the context of vector spaces rather than as a computational recipe. This allows the authors to use linear independence, spanning sets and bases, and the four fundamental subspaces to explain and exploit Gaussian elimination and the LU factorization, as well as the solution of overdetermined linear systems in the least squares sense and eigenvalues and eigenvectors.

Jan 2023 225pp

American Mathematical Society

## ALGEBRAIC GEOMETRY

### Notes on a Course

Michael Artin

*Graduate Studies in Mathematics, Vol. 222*

Provides an introduction to the geometry of complex algebraic varieties. The book is intended for students who have learned algebra,

analysis, and topology, as taught in standard undergraduate courses. It is a suitable text for a beginning graduate course or an advanced undergraduate course.

2022 322pp

9781470471118 Paperback £78.00 / €86.00

If you are a teaching academic or course leader you may request up to three titles as FREE inspection copies to consider as textbooks for students on your course. For further details please visit: [eurospan.co.uk/inspection](http://eurospan.co.uk/inspection)

## ALGEBRAS, LATTICES, VARIETIES

### Volume II

Ralph S. Freese et al

*Mathematical Surveys and Monographs, Vol. 268*

A three-volume set that provides a consistent framework for understanding algebraic systems, including

groups, rings, modules, semigroups and lattices. Volume I, first published in the 1980s, built the foundations of the theory and is considered to be a classic in this field.

2022 497pp

9781470467975 Paperback £114.00 / €127.00

## A BRIDGE TO ADVANCED MATHEMATICS

### From Natural to Complex Numbers

Sebastian M. Cioaba & Werner Linde

*Pure and Applied Undergraduate Texts, Vol. 58*

Most introduction to proofs

textbooks focus on the structure of rigorous mathematical language and only use mathematical topics incidentally as illustrations and exercises. In contrast, this book gives students practice in proof writing while simultaneously providing a rigorous introduction to number systems and their properties.

Feb 2023 525pp

9781470471484 Paperback £80.00 / €90.00

## CATEGORIES AND REPRESENTATION THEORY

### With A Focus on 2-Categorical Covering Theory

Hideto Asashiba

*Mathematical Surveys and Monographs, Vol. 271*

Presents a self-contained

account of applications of category theory to the theory of representations of algebras. The main focus is on 2-categorical techniques, including 2-categorical covering theory.

2022 250pp

9781470464844 Paperback £114.00 / €127.00

**COMPLETION PROBLEMS ON OPERATOR MATRICES**

Dragana S. Cvetković Ilić  
*Mathematical Surveys and Monographs, Vol. 267*

Provides an overview of completion problems dealing with completions to different types of operators and can be considered as a natural extension of classical results

concerned with matrix completions. The book assumes some basic familiarity with functional analysis and operator theory.

2022 170pp  
9781470469870 Paperback £114.00 / €127.00

**CONTINUOUS SYMMETRIES AND INTEGRABILITY OF DISCRETE EQUATIONS**

Decio Levi, Pavel Winternitz & Ravil I. Yamilov  
*CRM Monograph Series, Vol. 38*

Presents new results on applications of symmetries and integrability techniques to the case of equations

defined on the lattice. This relatively new field has many applications, for example, in describing the evolution of crystals and molecular systems defined on lattices.

Feb 2023 496pp  
9780821843543 Hardback £114.00 / €127.00

**A co-publication of the AMS and Centre de Recherches Mathématiques**

**CYCLIC COHOMOLOGY AT 40**

**Achievements and Future Prospects**  
Edited by A. Connes et al  
*Proceedings of Symposia in Pure Mathematics, Vol. 105*

Presents survey articles providing a user-friendly introduction to applications of cyclic cohomology

in such areas as higher categorical algebra, Hopf algebra symmetries, de Rham-Witt complex, quantum physics, etc, in which cyclic homology plays the role of a unifying theme.

Apr 2023 579pp  
9781470469771 Paperback £127.00 / €140.00

**EXPLORING MATHEMATICS WITH CAS ASSISTANCE**

**Topics in Geometry, Algebra, Univariate Calculus, and Probability**  
Lydia S. Novozhilova & Robert D. Dolan  
*Classroom Resource Materials, Vol. 69*

Designed as a textbook for an innovative mathematics major course in using a computer-algebra system to investigate, explore, and apply mathematical ideas and techniques in problem solving. This book is designed modularly with student investigations and projects in number theory, geometry, algebra, single-variable calculus, and probability.

Feb 2023 245pp  
9781470469887 Paperback £60.00 / €66.00

**MAA Press**

**FINITE FIELDS, WITH APPLICATIONS TO COMBINATORICS**

Kannan Soundararajan  
*Student Mathematical Library, Vol. 99*

Uses finite field theory as a hook to introduce the reader to a range of ideas from algebra and number theory. This book constructs all

finite fields from scratch and shows that they are unique up to isomorphism.

Feb 2023 170pp  
9781470469306 Paperback £54.00 / €60.00

**A FIRST COURSE IN FRACTIONAL SOBOLEV SPACES**

Giovanni Leoni  
*Graduate Studies in Mathematics, Vol. 229*

Provides a gentle introduction to fractional Sobolev spaces which play a central role in the calculus of variations, partial differential

equations, and harmonic analysis. This book can serve as a reference for mathematicians working in the calculus of variations and partial differential equations as well as for researchers in other disciplines.

May 2023 579pp  
9781470472535 Paperback £80.00 / €90.00  
9781470468989 Hardback £123.00 / €137.00

### A FIRST COURSE IN SPECTRAL THEORY

Milivoje Lukić

*Graduate Studies in Mathematics, Vol. 226*

The central topic of this book is the spectral theory of bounded and unbounded self-adjoint operators on Hilbert spaces. After introducing the necessary prerequisites in

measure theory and functional analysis, the exposition focuses on operator theory and especially the structure of self-adjoint operators.

Feb 2023 474pp

9781470471927 Paperback £78.00 / €86.00

9781470466565 Hardback £114.00 / €127.00

### GEOMETRIC STRUCTURES ON MANIFOLDS

William M. Goldman

*Graduate Studies in Mathematics, Vol. 227*

Focuses on several successful classification problems. Namely, fix a geometry in the sense of Klein and a topological manifold. Then

the different ways of locally putting the geometry on the manifold lead to a 'moduli space'.

Jan 2023 437pp

9781470471989 Paperback £78.00 / €86.00

### GROUPS AND TOPOLOGICAL DYNAMICS

Volodymyr Nekrashevych

*Graduate Studies in Mathematics, Vol. 223*

Focuses on group-theoretic aspects of topological dynamics such as studying groups using their actions on topological spaces, using group theory to study symbolic

dynamics, and other connections between group theory and dynamical systems.

2022 695pp

9781470471200 Paperback £78.00 / €86.00

### INTRODUCTION TO PROOF THROUGH NUMBER THEORY

Bennett Chow

*Pure and Applied Undergraduate Texts, Vol. 61*

Lighten up about mathematics! Have fun. If you read this book, you will have to endure bad math puns and jokes and out-of-date pop

culture references. You'll learn some really cool mathematics to boot. In the process, you will immerse yourself in living, thinking, and breathing logical reasoning.

Feb 2023 442pp

9781470470272 Paperback £80.00 / €90.00

### INVERSE PROBLEMS AND ZERO FORCING FOR GRAPHS

Leslie Hogben, Jephian C.-H. Lin & Bryan L. Shader

*Mathematical Surveys and Monographs, Vol. 270*

Provides an introduction to the inverse eigenvalue problem for graphs (IEP- $G$ ) and the related area

of zero forcing, propagation, and throttling. The IEP- $G$  grew from the intersection of linear algebra and combinatorics and has given rise to a rich set of deep problems in that area as well as a breadth of 'ancillary' problems in related areas.

2022 286pp

9781470466558 Paperback £114.00 / €127.00

### AN INVITATION TO PURSUIT-EVASION GAMES AND GRAPH THEORY

Anthony Bonato

*Student Mathematical Library, Vol. 97*

Surveys different areas in graph searching and highlights many fascinating topics intersecting classical graph theory, geometry,

and combinatorial designs. Each chapter ends with approximately twenty exercises and five larger scale projects.

2022 254pp

9781470467630 Paperback £54.00 / €60.00

**LINEAR ALGEBRA**

**Vector Spaces and Linear Transformations**

Meighan I. Dillon

*Pure and Applied Undergraduate Texts, Vol. 57*

A textbook directed towards students who are familiar with matrices and their use in solving systems of linear equations. The emphasis is on the algebra supporting the ideas that make linear algebra so important, both in theoretical and practical applications.

Jan 2023 367pp

9781470469863 Paperback £78.00 / €86.00

**LOOKING FOR MATH IN ALL THE WRONG PLACES**

**Math in Real Life**

Shai Simonson

*Spectrum, Vol. 104*

In this thoroughly beguiling book, Shai Simonson applies mathematical tools in a variety of contexts that arise in everyday life to prove his claim that maths is,

literally, everywhere. Simonson applies his mathematical cast of mind to show that there are unexpected depths and connections when we look in the 'wrong' places in the right way.

2022 209pp

9781470470128 Paperback £31.95 / €36.00

**MAA Press**

**LOST IN THE MATH MUSEUM**

**A Survival Story**

Colin Adams

*Anneli Lax New Mathematical Library, Vol. 55*

From the twisted imagination of best-selling author Colin Adams comes this tale of sixteen-year-old Kallie trying to escape death at the hands of the exhibits in a mathematics museum. Kallie crosses paths with Carl Gauss, Bertrand Russell, Sophie Germain, G. H. Hardy, and John von Neumann, as she tries to save herself, her dad, and his colleague.

2022 209pp

9781470468583 Paperback £31.95 / €36.00

**MAA Press**

**THE MATHEMATICAL ANALYSIS OF THE INCOMPRESSIBLE EULER AND NAVIER-STOKES EQUATIONS**

**An Introduction**

Jacob Bedrossian & Vlad Vicol

*Graduate Studies in Mathematics, Vol. 225*

Provides graduate students with exposure to the mathematical analysis of the incompressible Euler and Navier-Stokes equations. The book gives a concise introduction to the fundamental results in the well-posedness theory of these PDEs, leaving aside some of the technical challenges presented by bounded domains or by intricate functional spaces.

2022 218pp

9781470471781 Paperback £78.00 / €86.00

**ONE-DIMENSIONAL ERGODIC SCHRÖDINGER OPERATORS**

**I. General Theory**

David Damanik & Jake Fillman

*Graduate Studies in Mathematics, Vol. 221*

Beginning with a refresher on key topics in spectral theory, this volume presents the basic theory of discrete one-dimensional Schrödinger operators with dynamically defined potentials. It also includes a self-contained introduction to the relevant aspects of ergodic theory and topological dynamics.

2022 444pp

9781470470869 Paperback £78.00 / €86.00

**A PANOPLY OF POLYGONS**

Claudi Alsina & Roger B. Nelsen

*Dolciani Mathematical Expositions, Vol. 58*

Presents and organises hundreds of beautiful, surprising and intriguing results about polygons with more than four sides. This panoply consists of eight chapters, one dedicated to polygonal basics, the next ones dedicated to pentagons, hexagons, heptagons, octagons and many-sided polygons.

### PRIMES OF THE FORM

$x^2 + ny^2$

**Fermat, Class Field Theory, and Complex Multiplication, Third Edition with Solutions**

David A. Cox

AMS Chelsea Publishing, Vol. 387

Examines when a prime  $p$  can be written in the form  $x^2 + ny^2$ . The book begins at an elementary level

with results of Fermat and Euler and then discusses the work of Lagrange, Legendre and Gauss on quadratic reciprocity and the genus theory of quadratic forms.

9781470470289 Paperback £60.00 / €66.00

AMS Chelsea Publishing

### RANDOM EXPLORATIONS

Gregory F. Lawler

Student Mathematical Library, Vol. 98

The emphasis of this book is on discrete models, but the final chapter gives an introduction to the continuous objects: Brownian motion, Brownian loop measures and soups, Schramm-Loewner

evolution, and the continuous Gaussian free field. A number of exercises scattered throughout the text will help gain a better understanding of the material.

9781470467661 Paperback £54.00 / €60.00

### SAGE FOR UNDERGRADUATES

Second Edition, Compatible with Python 3

Gregory V. Bard

As the open-source and free alternative to expensive software, Sage offers anyone with a web browser the ability to use cutting-edge mathematical software

and share the results with others, often with stunning graphics. This book is a gentle introduction to Sage for undergraduate students.

2022 481pp

9781470461553 Paperback £54.00 / €60.00

### THE TILING BOOK

An Introduction to the Mathematical Theory of Tilings

Colin Adams

Covers the necessary background on tilings and then delves into a variety of fascinating topics in the field, including symmetry groups, random tilings, aperiodic tilings, and quasicrystals. Although primarily focused on tilings of the Euclidean plane, the book also covers tilings of the sphere, hyperbolic plane, and Euclidean 3-space.

2022 295pp

9781470468972 Hardback £54.00 / €60.00

### TOPICS IN APPLIED MATHEMATICS AND MODELING

Concise Theory with Case Studies

Oscar Gonzalez

Pure and Applied Undergraduate Texts, Vol. 59

The subjects explored in the book are dimensional analysis and scaling,

dynamical systems, perturbation methods, and calculus of variations. These are immense subjects of wide applicability and a fertile ground for critical thinking and quantitative reasoning, in which every student of mathematics should have some experience.

Feb 2023 219pp

9781470469917 Paperback £78.00 / €86.00

### TOPOLOGICAL AND ERGODIC THEORY OF SYMBOLIC DYNAMICS

Henk Bruin

Graduate Studies in Mathematics, Vol. 228

Introduces symbolic dynamics from a perspective of topological dynamical systems. After introducing symbolic and

topological dynamics, the core of the book consists of discussions of subshifts of positive entropy, of zero entropy, other non-shift minimal action on the Cantor set, and the ergodic properties of these systems.

Feb 2023 460pp

9781470472191 Paperback £78.00 / €86.00

**TOPOLOGY OF NUMBERS**

*Allen Hatcher*

Provides an introduction to number theory at the undergraduate level, emphasizing geometric aspects of the subject. The geometric approach is exploited to explore in depth the classical topic of quadratic forms with integer coefficients, a central topic of the book.

**CONVEX OPTIMIZATION FOR MACHINE LEARNING**

Changho Suh

NowOpen

Provides an introduction to convex optimization, one of the powerful and tractable optimization problems that can be efficiently solved on a computer. The goal is to help develop a sense of what convex optimization is, and how it can be used in a widening array of practical contexts, with a particular emphasis on machine learning.

2022 350pp

9781638280521 Hardback £120.00 / €134.00

**STATISTICAL ANALYSIS OF NETWORKS**

Konstantin Avrachenkov &amp; Maximilien Dreveton

NowOpen

Offers a general introduction to the statistical analysis of networks, and can serve both as a research monograph and as a textbook. Numerous fundamental tools and concepts needed for the analysis of networks are presented, such as network modeling, community detection, graph-based semi-supervised learning and sampling in networks.

## SIAM - Society for Industrial and Applied Mathematics

**ADVANCED REDUCED ORDER METHODS AND APPLICATIONS IN COMPUTATIONAL FLUID DYNAMICS**

Gianluigi Rozza, Giovanni Stabile &amp; Francesco Ballarin

Computational Science and Engineering, Vol. 27

Reduced order modeling is an important, growing field in computational science and engineering, and this is the first book to address the subject in relation to computational fluid dynamics. It focuses on complex parametrization of shapes for their optimization and includes recent developments in advanced topics.

2022 466pp

9781611977240 Paperback £103.00 / €113.00

**THE BASICS OF PRACTICAL OPTIMIZATION**  
Second Edition

Adam B. Levy

Shows readers how optimization is done in practice and helps them to develop an appreciation for the richness of the theory behind the practice. Exercises, problems

(including modeling and computational problems), and implementations are incorporated throughout the text to help students learn by doing.

Jan 2023 160pp

9781611977363 Paperback £68.00 / €75.00

**BUSINESS DYNAMICS MODELS**  
Optimization-Based One Step Ahead Optimal Control

Eugenius Kaszkurewicz & Amit Bhaya  
*Advances in Design and Control, Vol. 40*

Introduces optimal control methods, formulated as optimization problems, applied

to business dynamics problems. The book includes solutions that provide a rationale for the use of optimal control and guidelines for further investigation into more complex models.

2022 190pp

9781611977301 Paperback £92.00 / €102.00

**EXTREMUM SEEKING THROUGH DELAYS AND PDES**

Tiago Roux Oliveira & Miroslav Krstic  
*Advances in Design and Control, Vol. 41*

Expands the scope of applicability of the extremum seeking method to infinite-dimensional systems. Readers will find numerous

algorithms for model-free real-time optimization are developed and their convergence guaranteed. Extensions from single-player optimization to noncooperative games, under delays and PDEs, are provided.

Jan 2023 442pp

9781611977349 Hardback £123.00 / €136.00

**FUNDAMENTALS OF NUMERICAL COMPUTATION**

Julia Edition  
Tobin A. Driscoll & Richard J. Braun

Julia is an open-source and fast-growing programming language for scientific computing that offers clarity and ease of use for beginners but also speed and

power for advanced applications. *Fundamentals of Numerical Computation: Julia Edition* provides a complete solution for teaching Julia in the context of numerical methods.

2022 586pp

## ATTENUATION AND DISPERSION OF ELASTIC WAVES IN POROUS ROCKS

*Mechanisms and Models*

Boris Gurevich & José M. Carcione

*Geophysical References, Vol. 26*

Discussing macroscopic, mesoscopic, and local flow and including theoretical models and experimental evidence, this

book presents a systematic treatment of attenuation and dispersion mechanisms relevant to seismic, sonic, and ultrasonic wave propagation.

Feb 2023 536pp  
9781560803904 Hardback £167.00 / €184.00

## DISTRIBUTED ACOUSTIC SENSING FOR SEISMIC MEASUREMENTS

*What Geophysicists and  
Engineers Need to Know*

Mark Willis

*Distinguished Instructor, Vol. 25*

Technologists can be unaccustomed to using DAS seismic data sets since

it directly acquires relative strain or strain rate measurements and not the more familiar pressure, displacement, velocity, and acceleration data. This book is designed to build an intuition and understanding of the value, limitations and applications of DAS seismic technology.

## FIELD GUIDE TO OPTICS EDUCATION

### A Tribute to John Greivenkamp

Edited by J. Scott Tyo & Eric Pepper  
*Field Guides, Vol. 53*

Explores individual experiences with the development of methods and their application to the teaching of optics, especially in

higher education. The volume is dedicated to the memory of Professor John Greivenkamp, who was among the best known and most passionate educators of optics in the world.

Feb 2023 184pp

9781510653214 Spiral bound £18.95 / €21.00

## FUNDAMENTALS OF OPTICS

### An Introductory Course

Yobani Mejía-Barbosa  
*Press Monographs, Vol. 359*

Presents a simple yet elegant introduction to classical optics focused primarily on establishing fundamental concepts for students new to the field. With examples

demonstrating the use of optics in a wide range of practical applications, it reflects the pedagogical approach of the author.

Mar 2023 330pp

9781510657809 Paperback £57.00 / €63.00

## LIGHT PROPAGATION THROUGH BIOLOGICAL TISSUE AND OTHER DIFFUSIVE MEDIA

### Theory, Solutions, and Validations, Second Edition

Fabrizio Martelli et al  
*Press Monographs, Vol. 348*

A completely revised and improved edition that includes eight new chapters and six new appendices. In addition to the theoretical background on light propagation through diffusive media, this update also provides new didactical material.

Feb 2023 700pp

9781510650343 Paperback £95.00 / €105.00

## SEEING THE LIGHT

### Optics Without Equations

William Wolfe  
*Press Monographs, Vol. 349*

Explains the concepts of light, waves, photons, refraction, reflection, and diffraction for non-scientists without using equations. This book will be useful as background information for any

course in optics, for those who need a basic understanding of optics for their research or other activities, and for the curious.

9781510652125 Paperback £83.00 / €92.00

## SIMULATING SPECKLE WITH MATHEMATICA®

Joseph W. Goodman  
*Press Monographs, Vol. 355*

Devoted to simulation of speckle phenomena using the software package Mathematica. Various techniques for simulating speckle are discussed. Simulation topics

include first-order amplitude and intensity statistics, speckle phenomena in both imaging and free-space propagation, speckle at low light levels, and polarization speckle.

2022 105pp

9781510656543 Paperback £43.95 / €48.00

## USE OF SMARTPHONES IN OPTICAL EXPERIMENTATION

Yiping Zhao & Yoong Sheng Phang  
*Tutorial Texts, Vol. 124*

Shows how smartphone-based optical labs can be designed and realized. This book presents demonstrations of fundamental geometric and physical optical

principles, including the law of reflection, the law of refraction, image formation equations, dispersion, Beer's law, polarization, Fresnel's equations, and optical rotation.

## GREAT LIVES FROM HISTORY

### Scientists & Science, Second Edition

This second edition of *Great Lives from History: Scientists & Science* highlights nearly 400 of the greatest scientists in history, from Aristotle and the field of formal logic to Shinya Yamanaka and stem cell research. Last published in 2012, this new edition adds 10 years of scientific achievement to profile individuals who made life-changing discoveries in nearly 90 categories, including acoustics, anatomy, astrophysics, bacteriology, biochemistry, climatology, conservation biology, genetics, information theory, logic, nuclear physics, oceanography, oncology, quantum mechanics, relativity, thermodynamics, and virology.

With all entries reviewed, many updated, and the addition of many new scientists, this three-volume set includes current discussions on recent scientific discoveries in evolutionary biology, quantum theory and quantum chemistry, HIV and cancer treatments, immunology, MRI technology, neurodegeneration and more.

**GEOPOLITICS, CULTURE, AND THE SCIENTIFIC IMAGINARY IN LATIN AMERICA**

Edited by María del Pilar Blanco &amp; Joanna Page

Challenging the common view that Latin America has lagged behind Europe and North America in the global history of science, this volume reveals that the region has long been a centre for scientific innovation and imagination. It highlights the important relationship among science, politics, and culture in the region's history.

**THE SKY AT NIGHT****Easy Enjoyment from Your Backyard***Tim B. Hunter*

Ideal for backyard stargazers, this introduction to astronomy offers a unique blend of advice and personal observations. Drawn from decades of experiences and enjoyment watching the night sky, Tim Hunter helps beginners take up the hobby of watching the night sky.

An avid stargazer and astronomy columnist, Hunter covers all the basics - from the moon, planets, and stars to the history and origins of constellations and selected famous astronomers and events. Emphasis is on naked-eye viewing with an occasional reference to using a pair of binoculars or a small telescope, encouraging beginners to explore the skies while giving them a solid understanding of what they see.

***The University of Arizona Press*****ECLIPSE CHASERS***Nick Lomb & Toner Stevenson*

Witnessing a total solar eclipse is a wondrous and unforgettable event! *Eclipse Chasers* is a guide to past and future Australian total solar eclipses, exploring historical and cultural knowledge, as well as featuring five upcoming eclipses that will be visible in Australia. The science of eclipses is explained, as well as how to prepare for an eclipse and view it safely. For upcoming eclipses the best locations to view each one are revealed, alongside tips for taking photographs. This book also reveals untold stories of how past Australian astronomers observed the total eclipses that have occurred since European settlement, and how these eclipses were celebrated in popular culture, poetry and art. It explores the great significance of solar eclipses for First Nations peoples, and their observations and cultural meanings. *Eclipse Chasers* showcases the drama and beauty of total solar eclipses and is essential for anyone fascinated by these amazing events.
